About AMG GLOBAL

At AMG Global Contracting, we believe in pushing boundaries & setting new standards in the construction industry.

With years of experience and a dedicated team of professionals, we have built a reputation for delivering high-quality projects on time and within budget. Our relentless pursuit of excellence and our commitment to customer satisfaction drive everything we do.

We take pride in our ability to tackle complex projects with confidence and efficiency, ensuring that every detail is meticulously planned and executed to perfection. From concept to completion, we are with you every step of the way, providing personalized solutions tailored to your specific needs.

Vision

Our vision at **AMG Global Contracting** is to be a leading force in the construction industry, known for our commitment to excellence, innovation, and sustainability. We aspire to exceed expectations and set new standards of quality and professionalism in everything we do.

Mission

Our mission is to deliver exceptional construction services that inspire confidence and trust. We are dedicated to building lasting relationships with our clients, employees, and partners, based on integrity, transparency, and mutual respect. Through continuous improvement and innovation, we strive to surpass our clients' expectations and create value for all stakeholders.

Why Choose Us?

Experience

Quality

Customer Focus

Innovation

Reliability

Partnership

Asphalt Works

At AMG Global Contracting, we specialize in asphalt works that pave the way for smooth and durable surfaces. Whether it's a new construction project or repairing existing pavement, our team is equipped with the expertise and state-of-the-art equipment to deliver exceptional results. From roadways to parking lots, we ensure that every asphalt surface meets the highest standards of quality and durability, providing a reliable foundation for years to come.

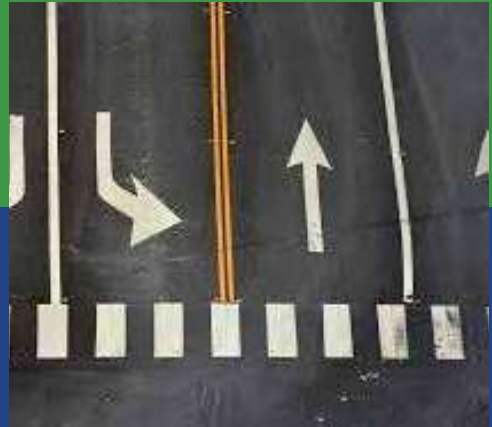

Precision in Pavement

Crafting Quality Asphalt Solutions.

Road Marking

Precision and clarity are essential when it comes to road marking, and at **AMG Global Contracting**, we excel in delivering precisely that. Our experienced team utilizes advanced techniques and high-quality materials to create crisp and durable road markings that enhance safety and efficiency on any roadway. Whether it's highways, streets, or parking lots, we ensure that every marking is clear, visible, and compliant with all relevant regulations.

Navigating Roads, Defining Safety

AMG's Road Marking Expertise.

Excavation

Excavation lays the groundwork for any construction project, and at AMG Global Contracting, we have the expertise and equipment to handle excavation jobs of any size and complexity. From site preparation to trenching and grading, our skilled team utilizes advanced machinery and techniques to ensure precise and efficient excavation, while adhering to strict safety standards.

Excavate with Excellence

AMG's Groundwork for Success.

Backfilling

Backfilling is a crucial step in many construction projects, providing stability and support to newly excavated areas. At AMG Global Contracting, we specialize in backfilling services that ensure the integrity and longevity of your project. Using high-quality materials and advanced techniques, our experienced team ensures that every backfilling job is completed to the highest standards, providing a solid foundation for future construction.

Civil Works

Civil works encompass a wide range of construction projects, from infrastructure development to building construction, and at AMG Global Contracting, we have the expertise and resources to tackle them all. Our experienced team specializes in delivering high-quality civil works, including bridges, tunnels, dams, and more, utilizing innovative solutions and state-of-the-art technology to meet the unique needs of each project.

Building Foundations, Constructing Dreams

AMG's Groundwork for Success.

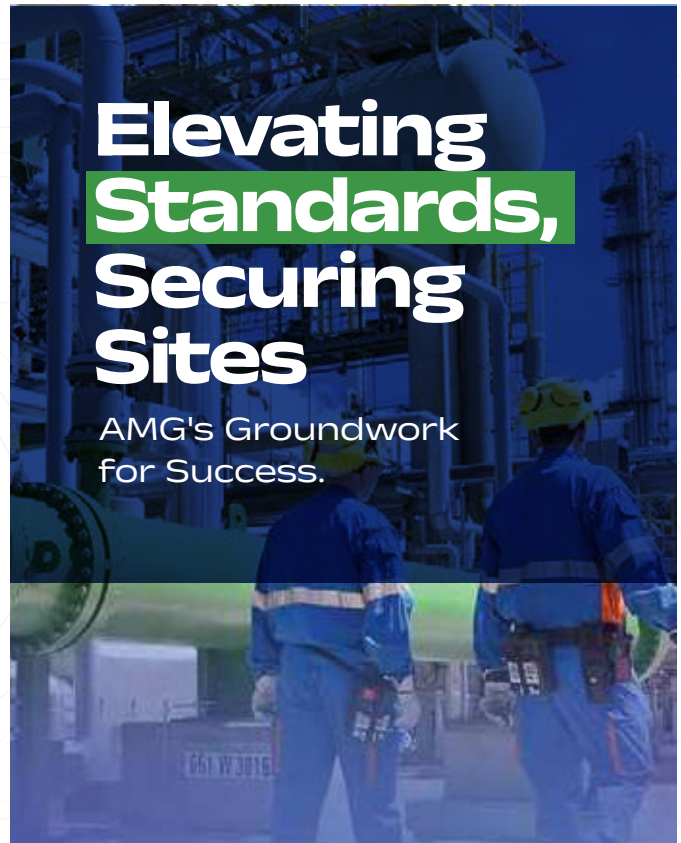

Scaffolding

Scaffolding plays a critical role in providing safe access and support for construction workers at elevated heights, and at AMG Global Contracting, safety is our top priority. We offer comprehensive scaffolding services, including design, installation, and dismantling, utilizing high-quality materials and adhering to strict safety standards to ensure the safety and efficiency of every project.

Plant Maintenance

AMG Global Contracting offers comprehensive plant maintenance services tailored to ensure the optimal functioning and longevity of industrial facilities. Our skilled technicians provide regular inspections, equipment servicing, and troubleshooting to minimize downtime and maximize productivity. With a commitment to efficiency and excellence, we keep your operations running smoothly, safeguarding your investment in plant infrastructure

Elevating Standards, Securing Sites

AMG's Groundwork for Success.

HYDRAULIC CONTROLLED BOLTING SERVICES

We are specialized in Hydraulic bolting Services with Certified bolting technicians (API / ECITB)- We have an ample number of crews as to cover our scope of services. Our specialists also offer complete project management of all bolting requirements from start to finish, including the design of tightening procedures and we undertake shutdowns jobs, emergency jobs, Short / Long term contracts and challenging jobs.

PIPE CUTTING AND BEVELLING

BOLTORQ can perform machining across a wide application range due to its best in class offering of portable pipe cutting inventory. With an industry leading max cutting capacity of 4495.8mm(177") OD, BOLTORQ has the equipment for your diverse range of applications.

HYDRAULIC TENSIONING SERVICES

We are specialized in Hydraulic Tensioning Services with Certified bolting technicians. It is the most accurate method of controlled bolt tightening currently in the industry. Bolt tensioning enables a direct load to be applied evenly across all bolts.

TORQUE SERVICES

We are specialized in Hydraulic Tensioning Services with Certified bolting technicians. It is the most accurate method of controlled bolt tightening currently in the industry. Bolt tensioning enables a direct load to be applied evenly across all bolts.

Industrial Support

Creating a comfortable and functional workspace is essential for the success of any construction project, and at AMG Global Contracting, we specialize in providing site office and camp facilities that meet the needs of our clients and their teams. From modular offices to temporary accommodations, we offer a wide range of solutions to ensure that every project has the infrastructure it needs to thrive.

Industrial Ingenuity,

AMG's Reliable Support Services.

Chemical Cleaning

From Grime to Gleam

AMG's Cleaning Services Shine.

1. Water-Jetting Services

We perform high pressure water jetting services with various capacities in cleaning of stationary equipment like exchangers, columns, vessels, towers, storage tanks, fin fans, associated pipelines, piping etc. In a professional and safe manner.

- Training & procedures are at forefront of industry.
- Jetters with high standard training
- Largest & most advanced jetting fleet in middle east
- Innovate techniques such as unblocking tubes filled with polymer.

2. Heat Exchanger Cleaning (Descaling) (SHELL, TUBE BUNDLE, TUBES)

Whether they're being used as heat exchangers or for condensing purposes tube bundles can be notoriously difficult to clean. Delight have invested in the latest portable uhp rotary and flexible lancing systems which enable us to remove blockages from previously uncleanable bundles. We have semi-automated systems

for cleaning both shell-side and tube-side situations which make the job several times quicker than traditional methods, meaning costs are kept to a minimum. Although this new technology is faster we will always consider the single hand held lance because in some circumstances this may be the best solution.

3. Heat Exchanger Bundle Pulling

Our extensive range of versatile tube bundle extractors are all you need for safe, efficient onsite tube bundle handling. To suit varied industry requirements we offer light and heavy tube bundle extractors for the removal and re-insertion of bundles both large and small.

4. Surface Preparation & Coating Services

- Hydro-blasting (WJ2/WJ3)
- Abrasive blasting (SA 2/SA2.5/SA3)
- Vacuum shot blasting
- Protective coating
- Poly-Urea coating

5. Oil Tank Cleaning Services

We can offer complete turnkey solutions towards tank cleaning services required for product change of crude oil, heavy fuel oil, gas and chemical storage with fixed and floating roofs for onshore tank farms.

- Gas freeing & inertisation
- De-sludging / de-mucking
- Tank washing hpwj

6. Hydro-Abrasive Cold Cutting Services

Water jet cutting is a proven method that can cut a wide variety of materials and can cut steel as thick as 8 inches. The cutter will work in conjunction with water jetting pump unit at pressure from 10000 to 40000 psi.

7. Uhp Blasting

- Hydro Blasting: WJ1 / WJ2 / WJ3
- Sand Blasting: SPS – SA1, SA2, SA2.5 & SA3
- Protective Coating & Painting
- Power Tooling & Surface Preparation
- Tank and Pipe Cleaning
- Ballasting
- Hull Crawler
- Subsea Jetting & Cleaning

8. Chemical Cleaning Services

- Acid pickling & passivation (cs)
- Stainless steel (ss) piping surface treatment
- Chemical treatment & passivation of district Cooling networks

9. Pipe Line Flushing Services

- Lube oil flushing
- High volume / velocity flushing
- Jet fuel hydrant system flushing

10. Hydro-Static Pressure Testing

A hydrostatic test is a way in which pressure vessels such as pipelines and tanks can be tested for strength and leaks following initial construction or repair work.

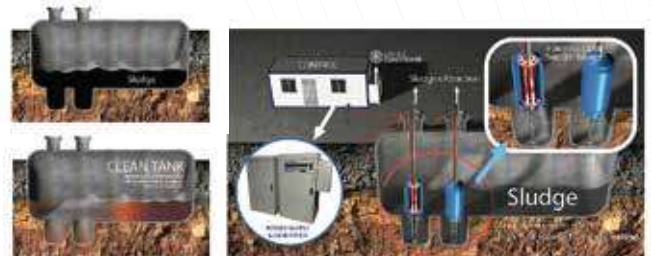

11. De-Watering Services

Leads the field in design, installation and maintenance of dewatering systems for construction sites of all sizes and depths. We design, install and operate four primary types of dewatering systems: deepwell systems, wellpoints systems, sump pump systems, and ejector well systems.

12. Ultra-Sonic Technology For Oil Tank Cleaning

Inductive thermo-sonic technology "its" is based on the generation and transmission of high-density and high frequency energy along the cable. High-power impulses produce heat, vibration and electromagnetic field. This effect cause a dissolution of the heavy oil parts, sludge or debris and can be used to clean the oil wells, pipelines or tanks.
